

Shiloh Pond Committee Meeting July 31, 2026

Present: Lynn Duttlinger, Brent West, Rob Woodhouse, Josh Fancy, Stacey McCluskey, Kathy Houston (via phone).

In response to recent reports of an uncomfortable public encountering a large group of men up at the Shiloh property, the committee decided a special meeting should be held prior to the Legendarios next return to Deer farm camps. The committee discussed concerns about large group activities on the Shiloh property. Focus was on the stated use of the property and ensuring the property is protected for its intended purpose, and the notification process to inform the public.

Specific discussion centered on recent visits by a group of up to 300 from Boston. Rob and Josh had met with the group and Kathy had spoken with Kevin Lecompte, the owner of Deer Farm Camps where the group stays, before they arrived. Agreements were made and outlined in an email summarizing conversations and expectations of the group sent on June 14, 2026 to Kevin Lecompte, who forwarded the email to the group leader.

Some of the agreements were not followed at the group's July visit, including the number of vehicles on the property and informing the committee of times the group would be on Shiloh property, specifically while at Shiloh Pond so the public could be informed. Before the group arrived, Josh had reached out to his contact with the group and received no feedback.

The Shiloh committee was uncomfortable with agreements not being followed, but thought there may be multiple reasons for this and decided to reach out to the group again to try to prevent any further problems. Josh agreed to reach out again to his group contact and reiterate the expectations to the group. The Shiloh committee also agreed to develop a Group Use policy for the long term and a short term proposal for the remainder of this year.

Short term proposals/solutions:

1. Agree to an approximate time and duration the group would be using the waterfront so we can let the public know and limit group size at any given time.
2. Limit vehicle use to 1 or 2 trucks transporting water and supplies to the group
3. Only use designated Shiloh trails. Those include the trail to the waterfall, past the waterfall, and the trail to the pond.
4. A member of the committee, Josh Fancy, will speak directly with the group leader to outline the concerns and inform them we are formulating a long term policy.
